

Product Vision

Problem Statement

Teachers must keep track of grades for many students and different types of assessments, such as assignments, exams and projects. Recording these grades and calculating averages manually can take a lot of time and can also cause mistakes. When different tools are used, it can become harder to keep student information organized and prepare report cards.

Target Audience

Our product is mainly designed for teachers who need to record student grades and keep track of their academic performance. It is especially useful for teachers who are looking for a simple way to enter grades, calculate averages, manage weighted assessments and create report cards. School's admins, that will manage user accounts, their academic groups, creation of course and oversee overall system.

Value Proposition

Our product gives teachers a simple digital gradebook where they can manage student grades and academic information in one place. This helps reduce the amount of manual work, prevents calculation mistakes and makes managing student information more convenient.

Key Features and Functionality

- Add and manage student information
- Enter grades for assignments, exams, and projects
- Automatically calculate student averages
- Calculate weighted averages for different types of assessments
- Store and manage student and grade information
- Create report cards based on student grades and performance
